RAPID GÖ

Issued: 24.07.2003

LUBCON-oil-graphite-combination

RAPID GÖ contains colloidal graphite in non-hardening and non-cracking oil.

After extended influence of temperature, **RAPID GÖ** leaves a smooth, oil-type lubricating film, which forms a dry coating.

RAPID GÖ offers corrosion protection against wet and corrosive atmosphere.

RAPID GÖ is especially economical at lubricating points, which are heavily to reach.

RAPID GÖ ensures long lubricating intervals, highest security and avoids metal contacts.

RAPID GÖ is above all suitable for slideways, spindles, spreading elements, keyings, plain bearings, toothed wheels, toothed racks and bolts.

Original packing

12 x 400 ml spray can
